Web Application to manage Employee Expenses list at Microsoft ASP.NET

AGRINO SA
FOOD INDUSTRY

AGRINO company, with business activity in rice and legume production, has entrusted ALTEC SOFTWARE solution to cover its needs of keeping and monitoring employee expenses.

Employee Expenses Management application is a **web application** running in any **Internet Browser** at mobile, tablet and pc and it is written in **Microsoft ASP.NET** environment. The communication with Atlantis ERP and xLine ERP is performed online.

It allows the users to manage their expenses effectively, to save and delete their entries fast and easily no matter their location. Employee Expenses Management application generates all accounting entries by automatically updating the cost centers, which could be several in case of more than one employee involved. It keeps, in detail, data for cars, projects and types of expenses. Moreover, it generates approval workflow procedures and informs, via email, the colleague or the manager for approval.

The Reporting Tools offer the ability to generate dynamic reports by using multiple criteria and filters.

Altec Software supports Voluntary Blood Donation

On May 13, 2013, the action of Voluntary Blood Donation took place at Altec Software premises.

The Altec Group participates regularly in this action as a gesture of love and social awareness.
